To Setup Kitchen Printer for the Octopus™ Food POS
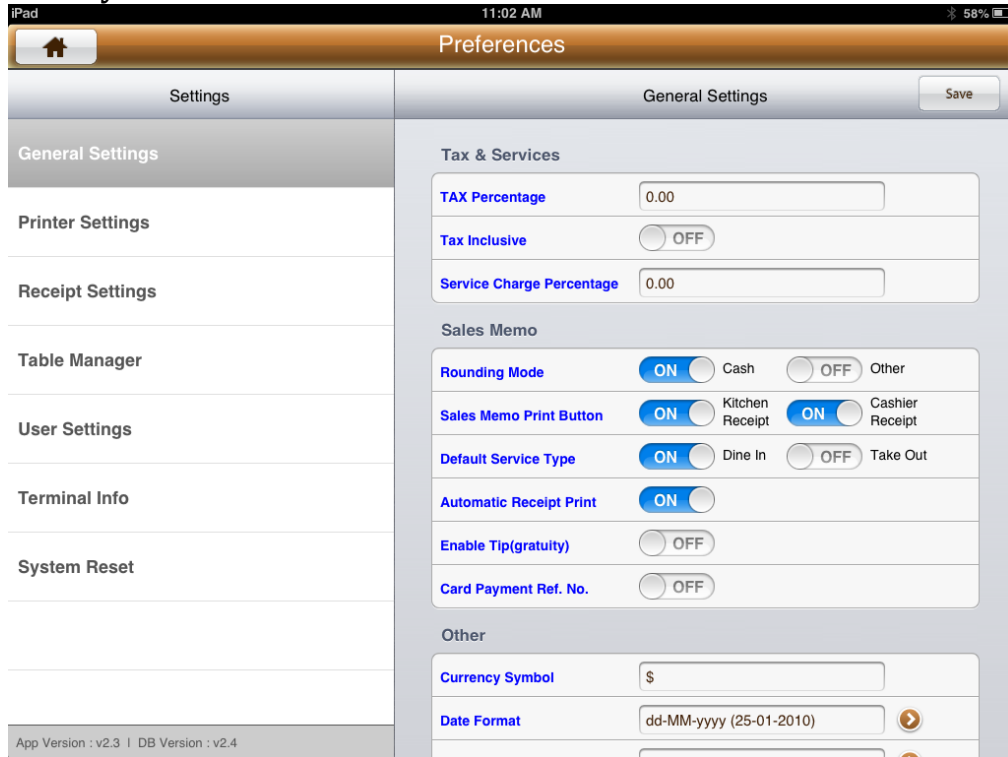

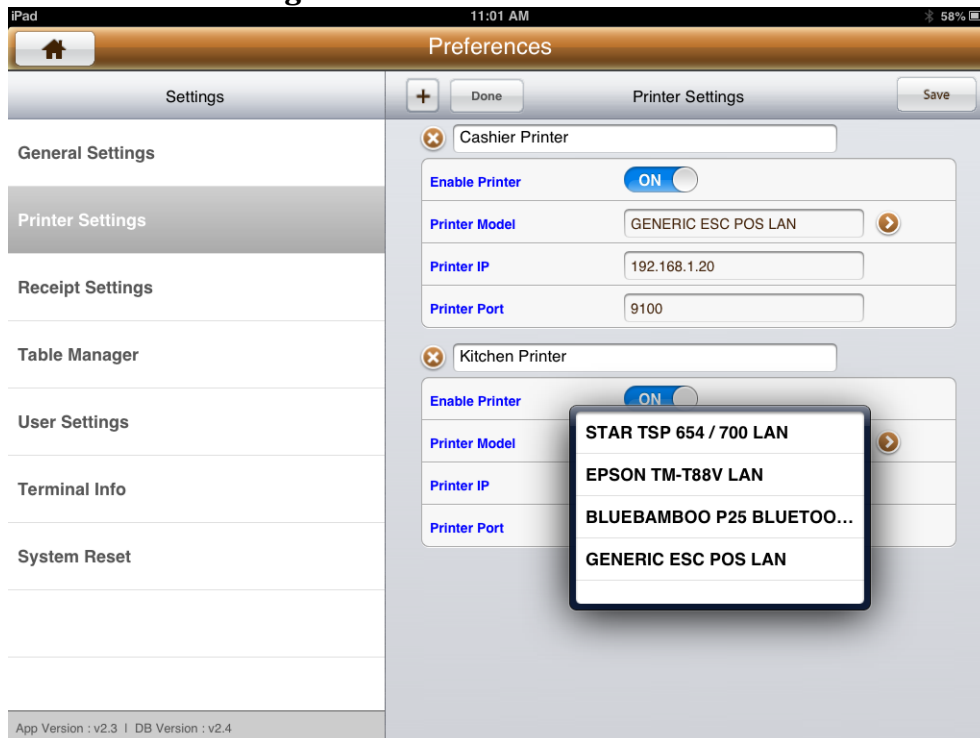

Make sure that the outlet is wifi – enabled and that you have the Router settings.

Goto System Administration ->

Goto Printer Settings

There should already be two printers set as default there.
Select the desired model as well as the IP address and the printer port – normally it
is 9100.

If you want to setup a new printer, click on the '+' sign at the top of the bar and enter
in the details accordingly.
